Plant Science, 87 (1992) 233–235
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 87 (1992)

Abscisic acid, artificial seeds, embryo maturation, seed development, 69
Agrobacterium rhizogenes, transformation, turnip, kale, rape, *Brassica*, 161
Agrobacterium, *Solanum commersonii*, potato, transformation, 179
Alginate coated beads, cryopreservation, shoot tips, apple, encapsulation-dehydration technique, pear and mulberry, 199
Allantoinase, xanthine oxidoreductase, uricase, wheat, *Puccinia recondita* f. sp. *tritici*, allopurinol, 225
Allopurinol, xanthine oxidoreductase, uricase, allantoinase, wheat, *Puccinia recondita* f. sp. *tritici*, 225
5-Aminolevulinic acid dehydratase, gabaculine, 5-aminolevulinic acid, glutamate-1-semialdehyde, 4,5-dioxovalerate, 123
5-Aminolevulinic acid, gabaculine, 5-aminolevulinic acid dehydratase, glutamate-1-semialdehyde, 4,5-dioxovalerate, 123
Antisense RNA, patatin, potato, storage protein, tuber, 45
Apple, cryopreservation, shoot tips, alginate coated beads, encapsulation-dehydration technique, pear and mulberry, 199
Artificial seeds, abscisic acid, embryo maturation, seed development, 69
Artificial seeds, bamboo, *Dendrocalamus strictus*, 109
ATP hydrolysis, membrane potential, nitrate, proton translocation, tonoplast vesicles, vacuoles, 133
Auxin, callus, nodal explants, micropropagation, 207
Auxin, plasma membrane H^+-ATPase, proton translocation, line-dependent sensitivity, *Petunia hybrida* lines, 19

Bamboo, artificial seeds, *Dendrocalamus strictus*, 109
Barley (*Hordeum vulgare* L.), nitrite reductase, regulation, 151
Biological X-ray microanalysis, *Camellia japonica*, rhizogenesis, embryogenesis, Ca^{2+}, scanning microscopy, 99
Brassica, transformation, *Agrobacterium rhizogenes*, turnip, kale, rape, 161

Ca^{2+}, *Camellia japonica*, rhizogenesis, embryogenesis, biological X-ray microanalysis, scanning microscopy, 99
Calcium, electron transfer, redox chain, transplasma membrane electron transfer, calmodulin, NADH oxidase, 39
Callus, auxin, nodal explants, micropropagation, 207
Callus, *Helianthus* L., sunflower, regeneration, plantlets, organogenesis, embryogenesis, 79
Calmodulin, electron transfer, redox chain, transplasma membrane electron transfer, calcium, NADH oxidase, 39
Camellia japonica, rhizogenesis, embryogenesis, Ca^{2+}, biological X-ray microanalysis, scanning microscopy, 99
Catharanthus roseus, CTP:PA cytidyltransferase, diacylglycerol kinase, phospholipase D, phosphatidylinositol-kinase, phosphatidylinositol-synthase, 29
Cell suspension, *Helianthus maximiliani*, protoplast culture, embryogenesis, 191
Cell wall formation, *Daucus carota*, 2,4-dichlorophenoxy acetic acid, exocytosis, freeze fracture, particle rosettes, plasmodesmata, somatic embryogenesis, wall texture, 85
Chitinase, lysoplate, lysozyme, pathogenesis-related proteins, polyacrylamide gel electrophoresis, tobacco, 55
Cryopreservation, shoot tips, apple, alginate coated beads, encapsulation-dehydration technique, pear and mulberry, 199
CTP:PA cytidyltransferase, *Catharanthus roseus*, diacylglycerol kinase, phospholipase D, phosphatidylinositol-kinase, phosphatidylinositol-synthase, 29

Daucus carota, cell wall formation, 2,4-dichlorophenoxy acetic acid, exocytosis, freeze fracture, particle rosettes, plasmodesmata, somatic embryogenesis, wall texture, 85
Dendrocalamus strictus, artificial seeds, bamboo, 109
Diacylglycerol kinase, *Catharanthus roseus*, CTP:PA cytidyltransferase, phospholipase D, phosphatidylinositol-kinase, phosphatidylinositol-synthase, 29
2,4-Dichlorophenoxy acetic acid, cell wall formation, *Daucus carota*, exocytosis, freeze fracture, particle rosettes, plasmodesmata, somatic embryogenesis, wall texture, 85
4,5-Dioxovalerate, gabaculine, 5-aminolevulinic acid, 5-aminolevulinic acid dehydratase, glutamate-1-semialdehyde, 123

Electron transfer, redox chain, transplasma membrane electron transfer, calcium, calmodulin, NADH oxidase, 39
Embryo maturation, abscisic acid, artificial seeds, seed development, 69
Embryogenesis, *Camellia japonica*, rhizogenesis, Ca^{2+}, biological X-ray microanalysis, scanning microscopy, 99
Embryogenesis, *Helianthus maximiliani*, cell suspension, protoplast culture, 191
Embryogenesis, *Helianthus* L., sunflower, callus, regeneration, plantlets, organogenesis, 79
Encapsulation-dehydration technique, cryopreservation, shoot tips, apple, alginate coated beads, pear and mulberry, 199

Endogenous β-glucuronidase, toxin glucuronides, D-saccharic acid 1,4-lactone, tobacco (*Nicotiana tabacum* L.), 115
Exocytosis, cell wall formation, *Daucus carota*, 2,4-dichlorophenoxy acetic acid, freeze fracture, particle rosettes, plasmodesmata, somatic embryogenesis, wall texture, 85

Freeze fracture, cell wall formation, *Daucus carota*, 2,4-dichlorophenoxy acetic acid, exocytosis, particle rosettes, plasmodesmata, somatic embryogenesis, wall texture, 85

Gabaculine, 5-aminolevulinic acid, 5-aminolevulinic acid dehydratase, glutamate-1-semialdehyde, 4,5-dioxovalerate, 123
Germination, lipoxygenase, lyase (*Vicia sativa*), linoleic acid, 143
Globulins (11S), *Pinus pinaster*, storage proteins, glutelins, 9
β-Glucuronidase (GUS), particle bombardment, *Pisum sativum* L., transient gene expression, transformation, 171
Glutamate-1-semialdehyde, gabaculine, 5-aminolevulinic acid, 5-aminolevulinic acid dehydratase, 4,5-dioxovalerate, 123
Glutelins, *Pinus pinaster*, storage proteins, 11S globulins, 9
Glycine max, tripeptidyl peptidase, soybean, 1

Helianthus L., sunflower, callus, regeneration, plantlets, organogenesis, embryogenesis, 79
Helianthus maximiliani, cell suspension, protoplast culture, embryogenesis, 191

Immature embryo culture, *Pharbitis nil*, Japanese morning glory, somatic embryogenesis, plant regeneration, 215

Japanese morning glory, *Pharbitis nil*, immature embryo culture, somatic embryogenesis, plant regeneration, 215

Kale, transformation, *Agrobacterium rhizogenes*, turnip, rape, *Brassica*, 161

Line-dependent sensitivity, auxin, plasma membrane H^+-ATPase, proton translocation, *Petunia hybrida* lines, 19
Linoleic acid, lipoxygenase, lyase (*Vicia sativa*), germination, 143
Lipoxygenase, lyase (*Vicia sativa*), germination, linoleic acid, 143
Lyase (*Vicia sativa*), lipoxygenase, germination, linoleic acid, 143
Lysoplate, chitinase, lysozyme, pathogenesis-related proteins, polyacrylamide gel electrophoresis, tobacco, 55
Lysozyme, chitinase, lysoplate, pathogenesis-related proteins, polyacrylamide gel electrophoresis, tobacco, 55

Membrane potential, ATP hydrolysis, nitrate, proton translocation, tonoplast vesicles, vacuoles, 133
Micropropagation, auxin, callus, nodal explants, 207

NADH oxidase, electron transfer, redox chain, transplasma membrane electron transfer, calcium, calmodulin, 39
Nitrate, ATP hydrolysis, membrane potential, proton translocation, tonoplast vesicles, vacuoles, 133
Nitrite reductase, barley (*Hordeum vulgare* L.), regulation, 151
Nodal explants, auxin, callus, micropropagation, 207

Organogenesis, *Helianthus* L., sunflower, callus, regeneration, plantlets, embryogenesis, 79

Particle bombardment, β-glucuronidase (GUS), *Pisum sativum* L., transient gene expression, transformation, 171
Particle rosettes, cell wall formation, *Daucus carota*, 2,4-dichlorophenoxy acetic acid, exocytosis, freeze fracture, plasmodesmata, somatic embryogenesis, wall texture, 85
Patatin, antisense RNA, potato, storage protein, tuber, 45
Pathogenesis-related proteins, chitinase, lysoplate, lysozyme, polyacrylamide gel electrophoresis, tobacco, 55
Pear and mulberry, cryopreservation, shoot tips, apple, alginate coated beads, encapsulation-dehydration technique, 199
Petunia hybrida lines, auxin, plasma membrane H^+-ATPase, proton translocation, line-dependent sensitivity, 19
Pharbitis nil, Japanese morning glory, immature embryo culture, somatic embryogenesis, plant regeneration, 215
Phospholipase D, *Catharanthus roseus*, CTP:PA cytidyltransferase, diacylglycerol kinase, phosphatidylinositol-kinase, phosphatidylinositol-synthase, 29
Phosphatidylinositol-kinase, *Catharanthus roseus*, CTP:PA cytidyltransferase, diacylglycerol kinase, phospholipase D, phosphatidylinositol-synthase, 29
Phosphatidylinositol-synthase, *Catharanthus roseus*, CTP:PA cytidyltransferase, diacylglycerol kinase, phospholipase D, phosphatidylinositol-kinase, 29
Pinus pinaster, storage proteins, 11S globulins, glutelins, 9
Pisum sativum L., β-glucuronidase (GUS), particle bombardment, transient gene expression, transformation, 171
Plant regeneration, *Pharbitis nil*, Japanese morning glory, immature embryo culture, somatic embryogenesis, 215
Plantlets, *Helianthus* L., sunflower, callus, regeneration, organogenesis, embryogenesis, 79
Plasma membrane H^+-ATPase, auxin, proton translocation, line-dependent sensitivity, *Petunia hybrida* lines, 19
Plasmodesmata, cell wall formation, *Daucus carota*, 2,4-dichlorophenoxy acetic acid, exocytosis, freeze fracture, particle rosettes, somatic embryogenesis, wall texture, 85
Polyacrylamide gel electrophoresis, chitinase, lysoplate, lysozyme, pathogenesis-related proteins, tobacco, 55
Potato, *Solanum commersonii*, *Agrobacterium*, transformation, 179
Potato, antisense RNA, patatin, storage protein, tuber, 45
Proton translocation, ATP hydrolysis, membrane potential, nitrate, tonoplast vesicles, vacuoles, 133
Proton translocation, auxin, plasma membrane H^+-ATPase, line-dependent sensitivity, *Petunia hybrida* lines, 19
Protoplast culture, *Helianthus maximiliani*, cell suspension, embryogenesis, 191
Puccinia recondita f. sp. *tritici*, xanthine oxidoreductase, uricase, allantoinase, wheat, allopurinol, 225

Rape, transformation, *Agrobacterium rhizogenes*, turnip, kale, *Brassica*, 161

Redox chain, electron transfer, transplasma membrane electron transfer, calcium, calmodulin, NADH oxidase, 39
Regeneration, *Helianthus* L., sunflower, callus, plantlets, organogenesis, embryogenesis, 79
Regulation, nitrite reductase, barley (*Hordeum vulgare* L.), 151
Rhizogenesis, *Camellia japonica*, embryogenesis, Ca^{2+}, biological X-ray microanalysis, scanning microscopy, 99

D-Saccharic acid 1,4-lactone, endogenous β-glucuronidase, toxin glucuronides, tobacco (*Nicotiana tabacum* L.), 115
Scanning microscopy, *Camellia japonica*, rhizogenesis, embryogenesis, Ca^{2+}, biological X-ray microanalysis, 99
Seed development, abscisic acid, artificial seeds, embryo maturation, 69
Shoot tips, cryopreservation, apple, alginate coated beads, encapsulation-dehydration technique, pear and mulberry, 199
Solanum commersonii, potato, *Agrobacterium*, transformation, 179
Somatic embryogenesis, *Pharbitis nil*, Japanese morning glory, immature embryo culture, plant regeneration, 215
Somatic embryogenesis, cell wall formation, *Daucus carota*, 2,4-dichlorophenoxy acetic acid, exocytosis, freeze fracture, particle rosettes, plasmodesmata, wall texture, 85
Soybean, tripeptidyl peptidase, *Glycine max*, 1
Storage protein, antisense RNA, patatin, potato, tuber, 45
Storage proteins, *Pinus pinaster*, 11S globulins, glutelins, 9
Sunflower, *Helianthus* L., callus, regeneration, plantlets, organogenesis, embryogenesis, 79

Tobacco (*Nicotiana tabacum* L.), endogenous β-glucuronidase, toxin glucuronides, D-saccharic acid 1,4-lactone, 115
Tobacco, chitinase, lysoplate, lysozyme, pathogenesis-related proteins, polyacrylamide gel electrophoresis, 55
Tonoplast vesicles, ATP hydrolysis, membrane potential, nitrate, proton translocation, vacuoles, 133
Toxin glucuronides, endogenous β-glucuronidase, D-saccharic acid 1,4-lactone, tobacco (*Nicotiana tabacum* L.), 115
Transplasma membrane electron transfer, electron transfer, redox chain, calcium, calmodulin, NADH oxidase, 39
Transformation, β-glucuronidase (GUS), particle bombardment, *Pisum sativum* L., transient gene expression, 171
Transformation, *Agrobacterium rhizogenes*, turnip, kale, rape, *Brassica*, 161
Transformation, *Solanum commersonii*, potato, *Agrobacterium*, 179
Transient gene expression, β-glucuronidase (GUS), particle bombardment, *Pisum sativum* L., transformation, 171
Tripeptidyl peptidase, *Glycine max*, soybean, 1
Tuber, antisense RNA, patatin, potato, storage protein, 45
Turnip, transformation, *Agrobacterium rhizogenes*, kale, rape, *Brassica*, 161

Uricase, xanthine oxidoreductase, allantoinase, wheat, *Puccinia recondita* f. sp. *tritici*, allopurinol, 225

Vacuoles, ATP hydrolysis, membrane potential, nitrate, proton translocation, tonoplast vesicles, 133

Wall texture, cell wall formation, *Daucus carota*, 2,4-dichlorophenoxy acetic acid, particle rosettes, freeze fracture, exocytosis, plasmodesmata, somatic embryogenesis, 85
Wheat, xanthine oxidoreductase, uricase, allantoinase, *Puccinia recondita* f. sp. *tritici*, allopurinol, 225

Xanthine oxidoreductase, uricase, allantoinase, wheat, *Puccinia recondita* f. sp. *tritici*, allopurinol, 225
